10 Work Undertaken that Best Illustrates Capability to Handle the Tasks Assigned

Nature-based data demonstration platform — C40 “Creating a Baseline for Nature-based Data in Quezon City” proposal

Year: 2026 **Location:** Quezon City, Philippines

Client: Consortium proposal (with lead environmental planning firm)

Main project features:

- Interactive 3D city map (vector tiles, building extrusion, pitched camera) presenting nature-based data layers
- Dashboard views over a geospatial data store (PostgreSQL/PostGIS), with a QGIS/ArcGIS-to-GeoJSON file-update path for post-project maintenance
- Static-microsite delivery architecture: no backend and zero recurring hosting cost after turnover, designed for institutional succession

Positions held: Technology Lead — Web Systems & Data Platforms

Activities performed:

- Designed the platform architecture and succession model
- Built the working demonstration site: map engine, data layers, and dashboard
- Authored the technology methodology and turnover plan integrated into the proposal

Multi-entity salon operations platform — Piandré Salon group

Year: 2025–2026 **Location:** Metro Manila, Philippines

Client: Piandré Salon group (five corporate entities)

Main project features:

- Online booking, staff commissions engine, rewards, and payment processing across a shared PostgreSQL (Supabase) database
- Separate staff and corporate portals over one data model; card-fee (MDR) and withholding handling built into payouts
- Online retail store: products, gift certificates, and store pickup

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Designed the multi-entity data model and role-based access
- Built booking, commissions, and payments (Xendit) end to end
- Operate and iterate the platform in production

Accounting-practice back office & digital-invoice compliance — Accountinus

Year: 2026 (ongoing) **Location:** Metro Manila, Philippines

Client: Accountinus (five-entity Philippine accounting practice)

Main project features:

- Back-office system for a multi-entity accounting firm
- Data model and workflows targeting BIR Electronic Invoicing System (EIS) digital-invoice compliance

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Designed the compliance-oriented data model
- Building invoicing and back-office workflows with the firm's partners

Operations & document platforms — ops.post205.com and sign.post205.com

Year: 2025–2026 **Location:** Metro Manila, Philippines

Client: Post 205, Inc. (production platforms used across client engagements)

Main project features:

- Operations command center: clients, leads, engagements, payment notices, compliance calendar, and analytics
- Dynamic service-agreement platform with e-signature, acceptance audit trail, and notarizable document mode
- Secure public-form architecture: bot protection, serverless write paths, database-level access revocation

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Designed and shipped both platforms
- Built serverless functions, email systems (Resend), and e-sign flows
- Run them daily as POST205's own back office — the systems sold are the systems used

Cooperative finance portal — Salon Multi-Purpose Cooperative (SMPC)

Year: 2026 (ongoing) **Location:** Metro Manila, Philippines

Client: Salon Multi-Purpose Cooperative (Piandré employees' cooperative)

Main project features:

- Web rebuild of the cooperative's legacy MS Access system (smpc.piandre.com)
- Share-capital ledgers built from salary deductions; loans against share capital; year-end dividends
- Loan-eligibility computation and approval workflow encoded auditably, replacing a single-person manual process
- Row-level security isolating cooperative financial data inside a shared database

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Designed the financial data model and security policies
- Encoding the eligibility rules and approval workflow with the cooperative's officers

Multi-publication content platform — CADMC / Advocates

Year: 2026 (ongoing) **Location:** Metro Manila, Philippines

Client: CADMC (legal advocacy publication group)

Main project features:

- Multi-publication CMS on a single PostgreSQL (Supabase) instance
- Editorial workflows and publication surfaces for several titles under one platform

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Designed the multi-publication schema
 - Built and deployed the platform; migrated legacy article archives
-

Community platforms — alumni and association systems

Year: 2025–2026 **Location:** Metro Manila, Philippines

Client: Ateneo HS 2001 alumni association (01bigfight); Poveda 2002 (povedans.com); BNI chapter (all-stars)

Main project features:

- Alumni pledge and homecoming platforms with payments and email confirmation
- Association member directory, analytics, and role-based admin systems

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Designed and shipped each platform end to end
 - Built reusable patterns (secure submissions, member admin) now shared across projects
-

School back office & website — Creative Learning School, Inc. (CLSI)

Year: 2026 (in build) **Location:** Pasig City, Philippines

Client: Creative Learning School, Inc. (private preparatory school, est. 1988)

Main project features:

- Website rebuild plus a working school command center: dashboard (enrollment, attendance, academic standing on DepEd descriptors, collections)
- Teacher console with class-scoped access, student watchlist, and per-student 360 view (grades, attendance, tuition)
- One-tap attendance and grade encoding that feeds DepEd forms (SF1/SF2, SF9/SF10) through to report cards and the dashboard
- Concept system runs on synthetic data, designed for RA 10173 (Data Privacy Act) compliance

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Built the website rebuild and the three back-office surfaces (dashboard, teacher console, encoder)
 - Designed the phased build: report-card generation, GCash-native billing, online re-enrollment
-

Asset registry & resale system — StagePro (events equipment)

Year: 2026 (in build) **Location:** Metro Manila, Philippines

Client: StagePro, Inc. (lights, sound, and staging equipment)

Main project features:

- Asset register tagged by depreciation profile: keep/in-service versus sell/liquidate
- Depreciation tracking over time — declining book value, age, sell-by dates
- Private resale board shared with specific buyers through unguessable per-buyer links

- Proposal engine, crew roster, and scheduling in the fuller system design

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Designed the system from the owner's stated problem: capital depreciating in idle equipment
 - Demonstrated the full back office as a working system before engagement
-

Guided-intake website — Serenity Shores (destination recovery, Palawan)

Year: 2026 (in build) **Location:** El Nido, Palawan, Philippines

Client: Serenity Shores (destination-recovery sanctuary)

Main project features:

- Website with a conversational concierge intake: scripted question spine with guardrailed AI reflection
- Secure serverless write path — no anonymous database inserts; row-level security throughout
- Crisis-safety and claim-safety rules engineered into the copy and conversation design

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Built the site and the concierge conversation engine
 - Designed the safety guardrails governing what the system may and may not say
-

Preschool website & front office — Little Way Playschool

Year: 2026 (in build) **Location:** Metro Manila, Philippines

Client: Little Way Playschool

Main project features:

- School website (programs, early years, getting started, inquiries)
- Front-office system for inquiries through enrollment

Positions held: Founder & Lead Engineer, POST205

Activities performed:

- Building the site and front office as one system
-

AI systems consultancy — System Mapping Sessions

Year: 2026 (ongoing) **Location:** Philippines

Client: Philippine SMEs (paid engagements via post205.com/mapping)

Main project features:

- A paid working session that maps every manual workflow in a business, prices each one per year, and delivers a one-page plan of what to automate first
- Session fee credited against a subsequent build engagement

Positions held: Consultant, POST205

Activities performed:

- Runs the sessions personally; findings feed directly into system design
